Michigan Technological University, Houghton, MI — *B.S. Computer Science*

SEP. 2013 - MAY 2019

EXPERIENCE

Coffee First Media USA — *Freelance Developer & Account Manager*

AUG. 2021 - PRESENT

- ❑ Guide clients from initial concept, to scoping, budgeting, prioritization of needs, to finished product
- ❑ Stay on target utilizing Agile frameworks and task tracking software such as Notion
- ❑ Communicate with external development teams to integrate changes if necessary
- ❑ Consistently leverage Technical Communication background to enhance client satisfaction

The Library of Virginia Richmond, VA — *Full Stack Web Developer*

NOV. 2019 - SEP. 2021

- ❑ Part of team to create internal WYSIWYG to transition away from decaying Wordpress technical debt
- ❑ Fielded requests from all levels of internal clients, organized priority, and delivered based on need
- ❑ Kept communication open across organizational teams to deliver status updates and receive feedback

24G Houghton, MI — *Remote Software Project Manager*

AUG. 2018 - FEB. 2019

- ❑ Managed remote team of developers with daily standups, issue tracking, and consistent communication
- ❑ Prototyped internal inventory tracking system utilizing Vue.js and Firebase to overhaul existing processes
- ❑ Recruited and evaluated new candidates during career fairs, breakout sessions, and requested presentations
- ❑ Worked with Account Managers to align best job candidates with appropriate clients

24G Clawson, MI — *Junior Web Developer*

JAN. 2017 - AUG. 2017, MAY 2018 - AUG. 2018

- ❑ SCRUM master for internal projects utilizing Kanban Boards, Jira, and Agile practices
- ❑ Developed and launched v1.0 of a powerful web app for Amazon marketing as a 2 person team
- ❑ Displayed metric visualizations from AMS API data aggregation pulled into a SQL DB
- ❑ HTML, Sass, JavaScript, Chart.js, FullCalendar.js, and Moment.js to organize the front end
- ❑ PHP and MySQL to manage the data throughput and organization then deployed on an AWS EC2

HGST (Western Digital) Rochester, MN — *Systems Integration Testing Lab Co-Op*

MAY 2015 - DEC. 2015

- ❑ Developed .ini file parser in PHP to remotely read test files, their status, and automate further testing
- ❑ Learned a new language to handle scripting (Python) to meet project requirements
- ❑ Participated in active code review to ensure that code met internal standards
- ❑ Integrated project into lab and achieved full automation and project goals
